The Newsletter for Parents of Children with Special Needs

SPECIAL
PARENT
INFORMATION
NETWORK

February 2014

Volume XXX, No. 3

SPIN is co-sponsored by the Disability & Communication Access Board and the Department of Education. Services include a phone line for information referral and support, a quarterly newsletter, an annual conference and community workshops. SPIN is guided by an Advisory Committee made up of parents, teachers and people with disabilities.

Hit a Home Run with SPIN!

Babe Ruth once said "Never allow the fear of striking out keep you from playing the game!" Of course his advice was about baseball, but his words also ring true for families who are looking for the best way to advocate for and support their child with special needs. Sometimes it's a daunting task, and SPIN has just the ticket to start the IEP season off right. It's our own special version of Spring Training, otherwise known as the annual SPIN Conference.

This year we're calling it '**Hit a Home Run with SPIN!**' and it's right around the corner on April 5th. Just look at our fabulous line-up:

Top notch speakers. We've even got one major league presenter, **Dr. Ruth Myers**, coming all the way from Minnesota.

Our own 'Baseball Commissioner for a Day'. He's otherwise known as **Deputy Superintendent Ronn Nozoe** and he'll be there to welcome you into the stands.

A stadium full of vendors. Walk down to the second floor and you'll find over 50 agencies that serve our keiki and who are eager to give you information.

Your own cheering squad.

One of the great things about the conference is that everyone is there to share great tips, state of the art information and encouragement to go to bat for your special keiki.

Affordable prices. Our \$25 registration fee for parents is the cheapest conference in town.

Comfortable seats and good eats.

As usual, we'll be at the University of Hawaii Manoa Campus Center with its spacious rooms and ono-licious food.

Cool prizes! Everything from baseball gear to gift cards and lots of goodies in between.

So don't wait. Go to page 6 to see our all-star line-up and send in your registration today. Our parent airfares are going fast!

Preparing for the New Statewide Assessment

This school year, all students in Kindergarten through twelfth grade have been learning Mathematics and English Language Arts based on Common Core State Standards (CCSS). English Language Arts (ELA) includes reading, writing, speaking and listening, language, media and technology.

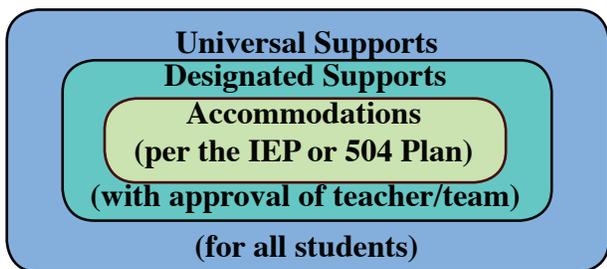

The CCSS provide clear expectations for what all students should learn at each grade level. They stress critical thinking, problem solving and communication skills required for success in higher education and 21st Century careers.

Smarter Balanced Assessment

With a change in standards comes the need for a new assessment system to give students, parents and teachers accurate information about whether students are on track to graduate from high school ready for college and the workplace. Hawaii is one of twenty-six states participating in the development of the **Smarter Balanced Assessment System**—a high quality statewide assessment that provides tools and information for schools to improve instruction and help students succeed, regardless of disability, language or background.

The beauty of the **Smarter Balanced Assessment** is in its design which uses the principles of Universal Design for Learning. The Smarter Balanced technology platform provides a variety of options that fit the needs of individual students, allowing each student to show what he or she has learned in relation to the Common Core Standards in ELA and Mathematics. These flexible supports are divided into 3 groups:

- **Universal Supports:** tools that are available to all students. They include options on the computer like zoom text, highlighter, breaks, and math tools, as well as extra supports like scratch paper or a Thesaurus.

- **Designated Supports:** additional supports that have been listed as needed by the student by a teacher or team (like color contrast, text-to-speech technology, or a separate test setting).
- **Accommodations:** changes in procedures or materials that increase equal access to the test for students with disabilities. An example is an American Sign Language video for a student who is Deaf.

A student with a disability can be aided in test-taking by all three categories of support, if needed.

Embedded vs. Non-Embedded

In each of the three broad groups of assessment supports, the optional features are either *embedded* or *non-embedded*. *Embedded supports* are built-in to the assessment software. *Non-embedded supports* are provided on the spot and can involve trained adults (like scribes), as well as separate tools (like an abacus or an assistive technology device) and separate seating.

<i>Embedded</i>	<i>Non-Embedded</i>
	<p>Supports like dictionaries, seating, extra time, etc.</p>

Documenting Test Supports

In order for the assessment process to run smoothly and adequately support the student, two things must happen:

- ✓ Designated supports and accommodations must be agreed upon **in advance** and documented, so that they can be in place on the day of the test; and
- ✓ The student must have time to practice using these supports before the actual assessment.

For students with disabilities, designated supports and accommodations should be discussed and selected in the IEP meeting or 504 Plan meeting.

Preparing for the New Statewide Assessment (cont.)

Smarter Balanced & the IEP Process

The annual IEP meeting requires a discussion of individualized supports and accommodations that may be needed in statewide assessments. Given that the IEP team is made up of individuals who know the strengths and needs of the student—including parents and the student, as appropriate—here are some **relevant questions to help with decision-making**:

Does the student need accommodations in daily instruction? If so, he or she will likely need them during testing.

What testing accommodations has the student regularly used? Are these accommodations or designated supports available in Smarter Balanced?

What do team members think about how well prior testing supports and accommodations have worked?

When considering new accommodations, is the student willing to use them?

Here are some **additional things to consider**:

Review Accommodations Annually

An accommodation should not be automatically carried over from year to year without a discussion of its fit to the student's current learning needs.

Involve the Student

The more a student is involved in selecting his or her accommodations, the more likely they will be used.

Practice Makes Perfect

Make sure the student has had opportunities to practice using the support or accommodation prior to testing.

Types of Supports & Accommodations

The accommodations and individualized supports required by an IEP or 504 Plan help to overcome or work around the student's disability without lowering his learning expectations.

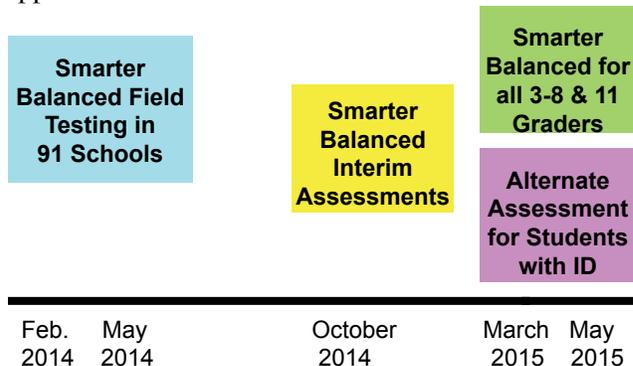

Accommodations have often been described as falling into the following four categories:

- ✓ Presentation
- ✓ Response
- ✓ Setting
- ✓ Timing/Scheduling

On page 3 we list Accommodations and Designated Supports for students with disabilities by category.

Smarter Balanced Timeline

Almost all students in Grades 3-8 and 11 are scheduled to take the Smarter Balanced Assessment sometime during the last 12 weeks of next school year (2014-15). The exception is a small group of students with significant cognitive or intellectual disabilities (ID) who will take an Alternate Assessment. Prior to that year-end assessment, students will have opportunities to take interim assessments.

During this school year, ninety-one schools have signed up to field test Smarter Balanced. The scores won't be reported. It's just an opportunity to try out the test for the first time and get both students and teachers familiar with how it should be given and how the various supports work.

Additional Information

If you would like more information about the Smarter Balanced Assessment and testing accommodations for students with disabilities, feel free to call SPIN, check out the following websites, and discuss with your child's IEP coordinator.

National Center for Learning Disabilities parent brief on testing accommodations

DESIGNATED SUPPORTS & ACCOMMODATIONS FOR STUDENTS WITH DISABILITIES

PRESENTATION: Different ways for the student to access information		
Who Can Benefit	Designated Supports	Accommodations
Students with print disabilities (difficulty or inability to visually read standard print because of a physical, sensory or cognitive disability)	Color contrast Color overlays Magnification (using an assistive technology device)	
Students who have reading-related disabilities	Read aloud by a trained adult (except for reading passages) Text-to-speech technology	
Students with vision disabilities	Magnification (using an assistive technology device)	Braille
Students with vision disabilities who are not Braille users	Text-to-speech technology Read aloud by a trained adult	Read aloud by a trained adult
Students with attention difficulties or distractability	Turning off universal tools Color contrast Color overlays Masking	
Students who are Deaf or hard of hearing and use American Sign Language		American Sign Language (ASL) Closed captioning
RESPONSE: Different ways for the student to show knowledge		
Who Can Benefit	Designated Supports	Accommodations
Students with vision disabilities		Abacus Braille or talking calculator
Students who have significant motor or processing difficulties	Scribe (a trained adult who writes down what a student dictates) - for non-writing items and math items	Alternate Response Options (like adapted keyboards) Scribe - for writing items Speech-to-text (using the student's voice to give responses for writing items)
Students with a calculation disability (like dyscalcula)		Multiplication table
Students with a recent injury that makes it difficult to type	Scribe (a trained adult who writes down what a student dictates) - for non-writing items and math items	Scribe - for writing items Speech-to-text
SETTING: Changing the location or conditions of the testing setting		
Who Can Benefit	Designated Supports	Accommodations
Students who are easily distracted (or may distract others)	Separate setting	
TIMING: Changing the length or organization of the time for testing		
Who Can Benefit	Designated Supports	Accommodations
Students who require designated supports or accommodations that add to the time needed to complete the test	NOTE: There is no need for a specific designated support or accommodation under timing, as the Smarter Balanced Assessment is not timed.

Remember to...

TAKE THE PARENT SURVEY

Please help the Department of Education (DOE) improve educational services for children in our state. Don't forget to complete the DOE parent survey that will be given out at your child's annual Individualized Education Program (IEP) meeting.

For more information, contact Karen Sato at 808-203-5560.

SPECIAL OLYMPICS PROJECT UNIFY

Project UNIFY is a school-based program which uses the sports and education programs of Special Olympics to activate students, with and without intellectual disabilities, to become agents of change within their school communities. Students work together to bring positive changes to their school climates by fostering respect, dignity and acceptance for all people.

The Project UNIFY movement began 6 years ago and is funded by a grant from the U.S. Department of Education. Special Olympics Hawai'i is proud to be one of the states that have been involved with Project UNIFY from the inception of the program.

Currently there are 43 elementary, middle and high schools in Hawai'i participating in Project UNIFY. Schools conduct activities that give special education and general education students the opportunity to interact and create friendships through sports and recreation, youth leadership and school-wide activities.

Project UNIFY has made a big difference at Hilo High School. Genuine friendships and admiration have developed between special education and general education students. Members from clubs, athletic teams and general education classes get together regularly with special education peers to have fun and encourage others to embrace the message of Project UNIFY. Students realize they are more alike than different and they all want the same thing... a friend who accepts you just the way you are. Hilo High has been featured in a national Special Olympics publication for their outstanding commitment to Project UNIFY.

For more information about Project UNIFY, contact Tracey Bender at (808) 695-3524 or unify@specialolympicshawaii.org.

KEIKI HEALTH FAIR "Let's Hold Hands"
